CLOUD SECURITY

CLOUD SECURITY REVIEW

For Organisations Running on Azure or AWS

Find the Gaps Attackers Look for First

Most cloud breaches start with a misconfiguration, not a clever attack: storage left public, too many admin rights or logging switched off. This review checks one Azure subscription or AWS account against good practice, and gives you a prioritised list of fixes your team can act on.

FIXED PRICE · FROM
£1,250
ONE SUBSCRIPTION OR ACCOUNT
AZURE OR AWS

WHAT'S INCLUDED

01 Identity & Access
- Privileged roles and admins
- MFA and access policies
- Unused, over-powered accounts

02 Configuration
- Checked against CIS Benchmarks
- Secure defaults and policies
- Drift from good practice

03 Public Exposure
- Storage and data shares
- Network rules and open ports
- Internet-facing services

04 Logging & Detection
- Audit logging switched on
- Alerts and threat detection
- Log retention reviewed

05 Report & Roadmap
- Findings rated by severity
- Step-by-step fixes
- Readout call with Alexander

WHY REVIEW YOUR CLOUD?
One misconfiguration can expose your data to the internet. A review finds it before someone else does.

WHO IS THIS FOR?
- Firms running on Azure or AWS
- SaaS and tech start-ups
- No in-house cloud security
- Teams after a cloud migration

YOU WILL RECEIVE
- Findings rated by severity
- Step-by-step fixes
- A CIS Benchmark comparison
- A 60-minute readout call

WHY WORK WITH ALEXANDER?

Alexander Akinjayeju
MSc | CISSP | CCSK | CISO
- Cyber Security Leader
- Cloud Architect · AI Advisor
- 20+ years in cyber security

SCOPE, PRICES & TERMS

Cloud Security Review — What You Get

A read-only review of your cloud configuration, at a fixed price.

SCOPE STATEMENT

The Cloud Security Review is a read-only technical review of one Microsoft Azure subscription or one AWS account. Alexander checks identity and privileged access, configuration against the CIS Benchmarks, public exposure of storage, networks and services, and logging and threat detection.

You get a report rating each finding by severity, with step-by-step fixes your team or provider can follow. Access is read-only: Alexander does not change your settings, and no penetration testing is carried out.

CHOOSE YOUR SCOPE	SINGLE One subscription or account · MOST POPULAR	MULTI Up to 3 subscriptions or accounts
Subscriptions or accounts	**1**	Up to 3
Senior time	**1.5 days**	3 days
Identity and privileged access	**Full review**	Full review
CIS Benchmark comparison	**Key controls**	Key controls
Public exposure checks	**Included**	Included
Logging and detection	**Included**	Included
Written report	**Severity-rated findings and fixes**	Severity-rated, per environment
Readout call	**60 minutes**	90 minutes
Report delivered	**Within 7 working days**	Within 10 working days
Fixed fee One-off, invoiced on booking	**£1,250** one-off	**£2,450** one-off

Prices exclude VAT, which is added where applicable. Google Cloud, Kubernetes clusters or more than 3 environments: priced on request.

ENGAGEMENT TERMS

- Fixed price: no hidden fees and no subscription
- Cyber Security Review fee credited if booked within 60 days
- Signed scope and access authorisation before work starts
- Read-only access, removed after the review
- Findings shared only with your named contact
- vCISO Retainer clients get 10% off this review

NOT INCLUDED (CAN BE QUOTED SEPARATELY)

- Penetration testing (via an accredited partner)
- Making changes (remediation support: £850 per day)
- Application code or container reviews
- Microsoft 365 (see M365 Security Review)
- Ongoing cloud monitoring

WHAT WE NEED FROM YOU

- A named contact with authority to grant access
- Azure Reader and Security Reader, or AWS SecurityAudit
- Your cloud or IT provider available for questions

WHERE NEXT?

Natural next steps once your findings are in.

Microsoft 365 Security Review	Incident Response Tabletop	vCISO Retainer
£795	from £1,750	from £795/month
